S P A S A U N A**

You can be sure that you won't find such a sauna anywhere else. It's not just about the appearance (although we've taken care of the design from the roof down to the smallest screw), but above all, about the quality. For 15 years, we've been serving premium customers, and we know that traditional solutions don't meet their expectations. That's why we've taken care of every detail. Europool Spa Sauna is handcrafted, using durable wood, innovative heaters, and convenient controllers. It's a premium product that will provide you with luxury on your terms.

Sauna Type: Finnish, outdoor Sauna
 Dimensions: 2500 x 3500 x 2600 mm
 Capacity: 6 persons
 Temperature Range: approx. 40 – 110°C
 Sauna Weight: 2800 kg
 Wall Thickness: 130 mm
 Number of Rooms: 2
 Sauna Room Dimensions: 2270 x 2230 mm
 Vestibule Dimensions: 830 x 2230 mm
 Door Dimensions: 2100 x 1150 mm
 Window Dimensions: 2000 x 2010 mm
 Window Type: 3-pane, 2-chambered window
 Insulation: mineral rock wool 10 cm
 Sauna construction material: thermorys aspen/alder wood (benches), Saunaply wood (interior), HPL board (housing), polypropylene (flooring), steel structure
 Heater: Tulikivi HUURRE / Tulikivi KUURA
 Controller: HUUM UKU
 Included Accessories: Bluetooth audio system, thermometer, hourglass, bucket, ladle
 Sauna Warranty: 2 years
 Lead Time: 4-5 weeks

H A N D C R A F T E D
P R O D U C T I O N
I N P O L A N D

The majority of standard saunas are imported from abroad, where they are mass-produced in large manufacturing facilities. As one of the few, we manufacture our saunas entirely by hand in Poland, tailored to each client's individual project specifications.

T H E R M O R Y S
A N D S A U N A P L Y
W O O D

Thermorys and Saunaply Wood are durable, eco-friendly materials that resist warping, cracking, splintering, and excessive heat buildup over time. They require no impregnation and do not release resin, ensuring a comfortable and safe sauna experience without inhaling vapors during sauna sessions.

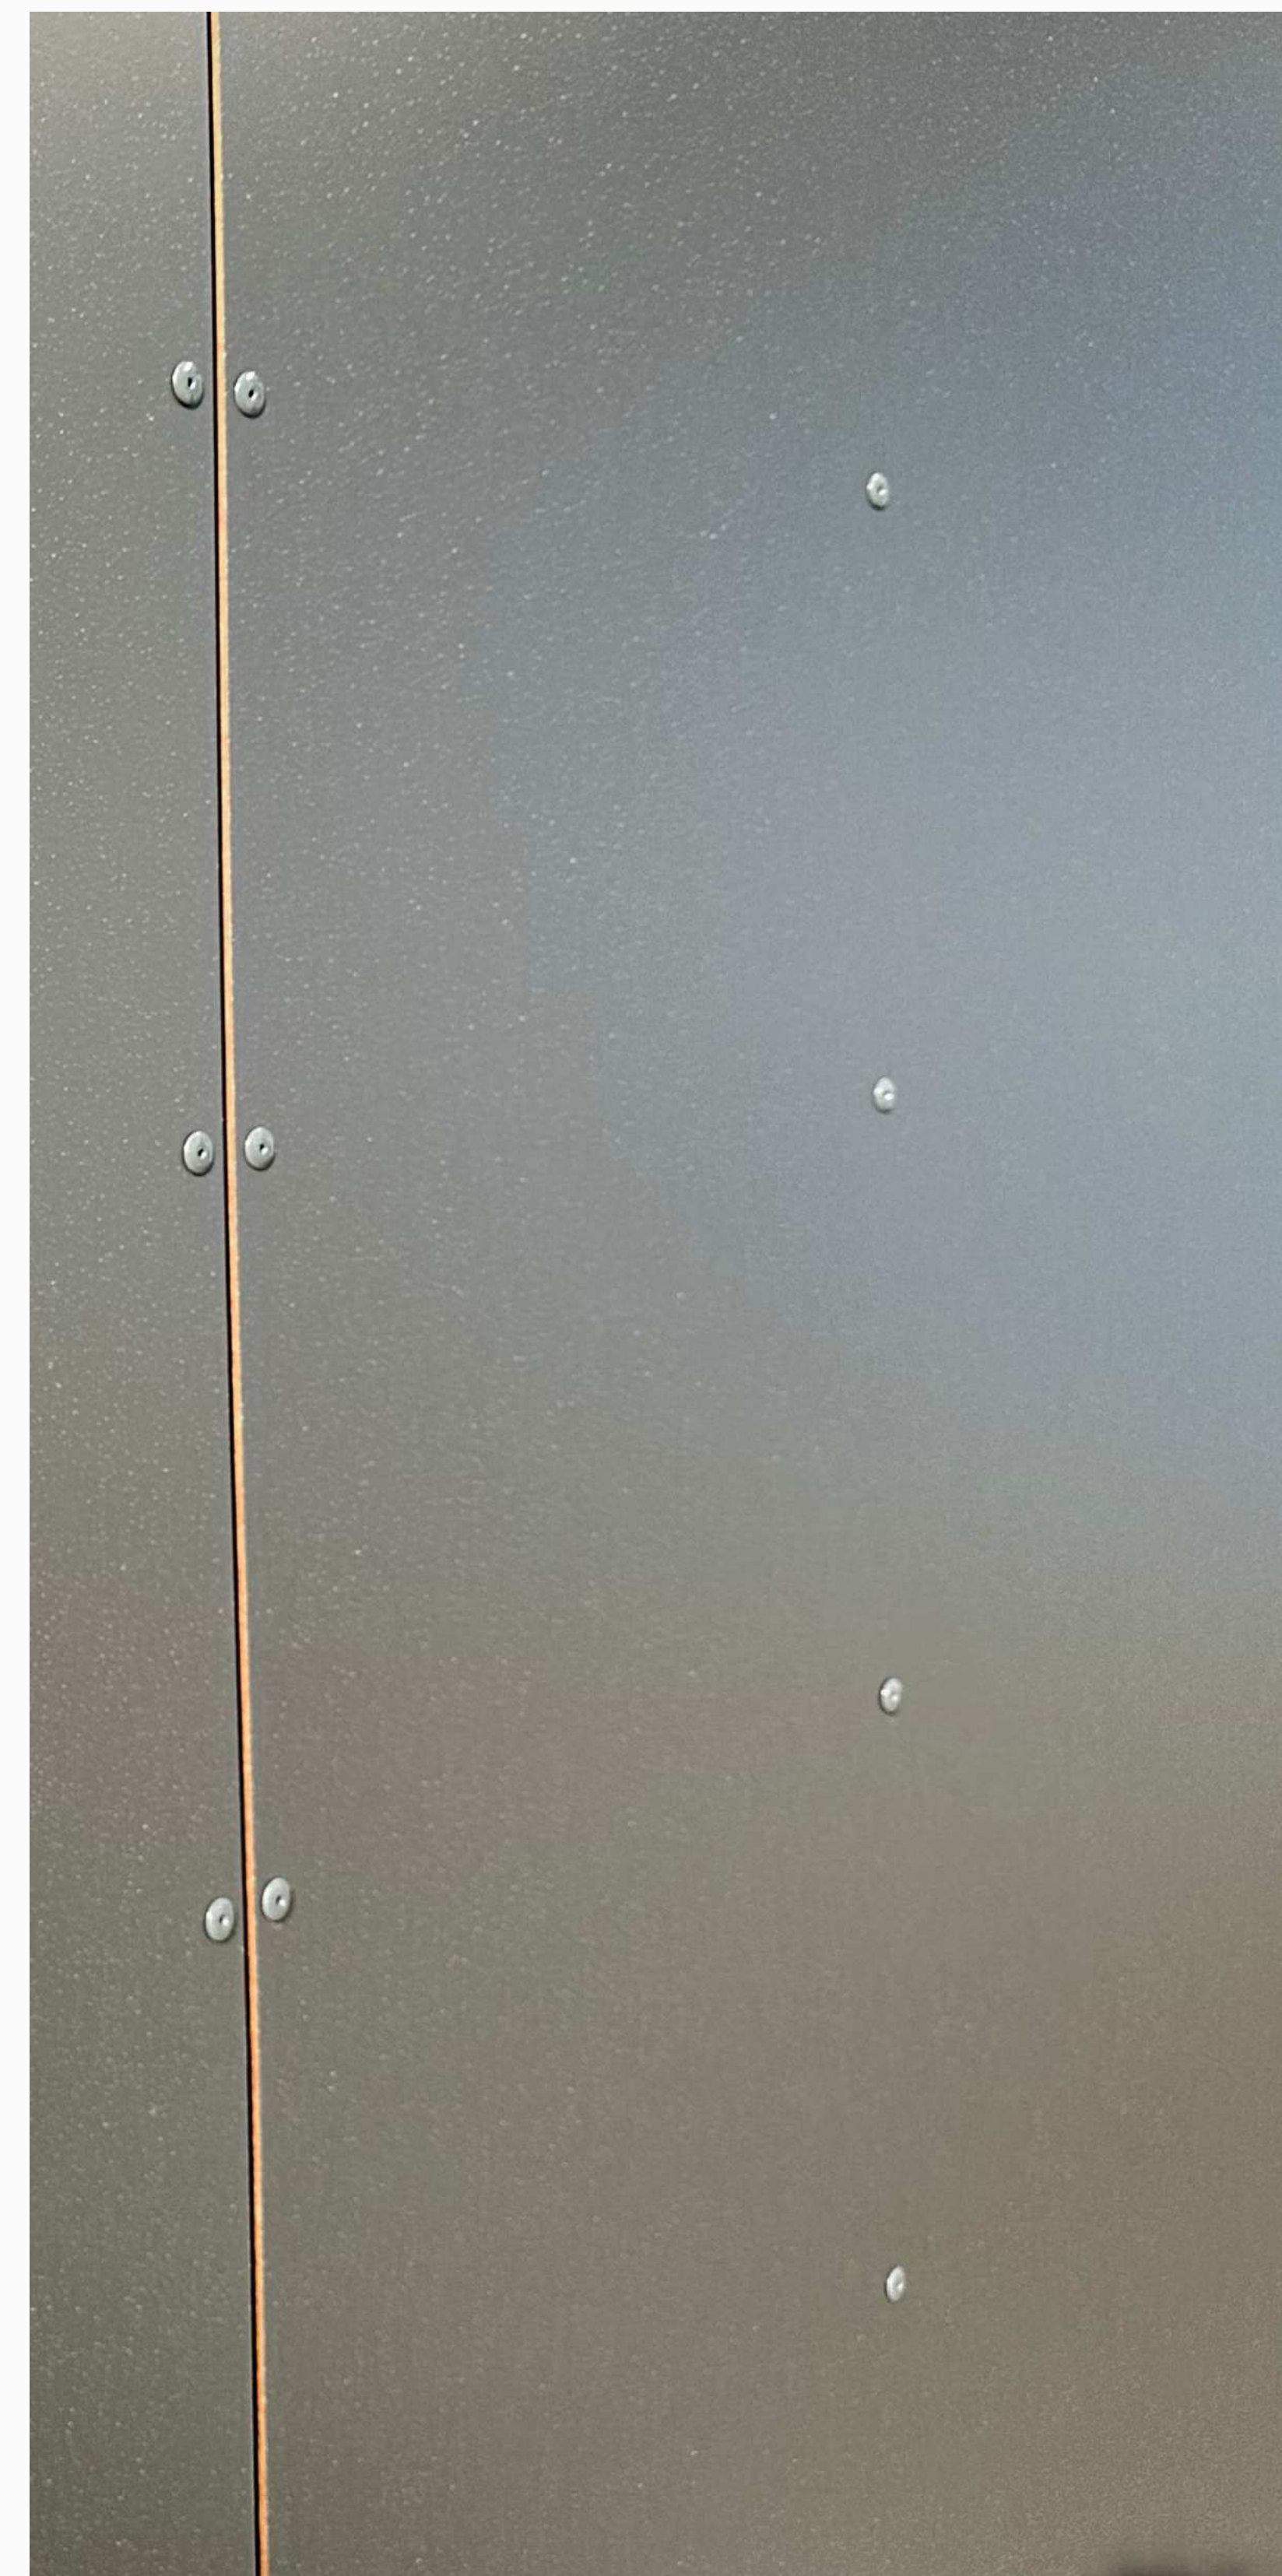

H P L C A S I N G

HPL (High-Pressure Laminate) is a material that is entirely resistant to atmospheric conditions and does not discolor under sunlight exposure. A wooden casing made of spruce wood is not resistant to atmospheric conditions, changes color over time, and requires regular impregnation.

S T E E L C O N S T R U C T I O N

A wooden construction tends to deform over time, requiring protection against insects, moisture, and mold, and it has a shorter lifespan compared to other materials. A sauna construction made of steel is practically everlasting.

H E A T E R

Looking for an affordable sauna? It's likely because there's no heater included! Heaters used in standard saunas take a long time to heat up and are energy-intensive. Their prices range between 70 and 250 Euro.

The Finnish company Tulikivi is a leading manufacturer of sauna heaters. With its high power output, the sauna heats up very quickly (approx. 30 minutes), and the stone construction efficiently retains heat, reducing energy consumption. The price of such a heater is approximately 2600 Euro.

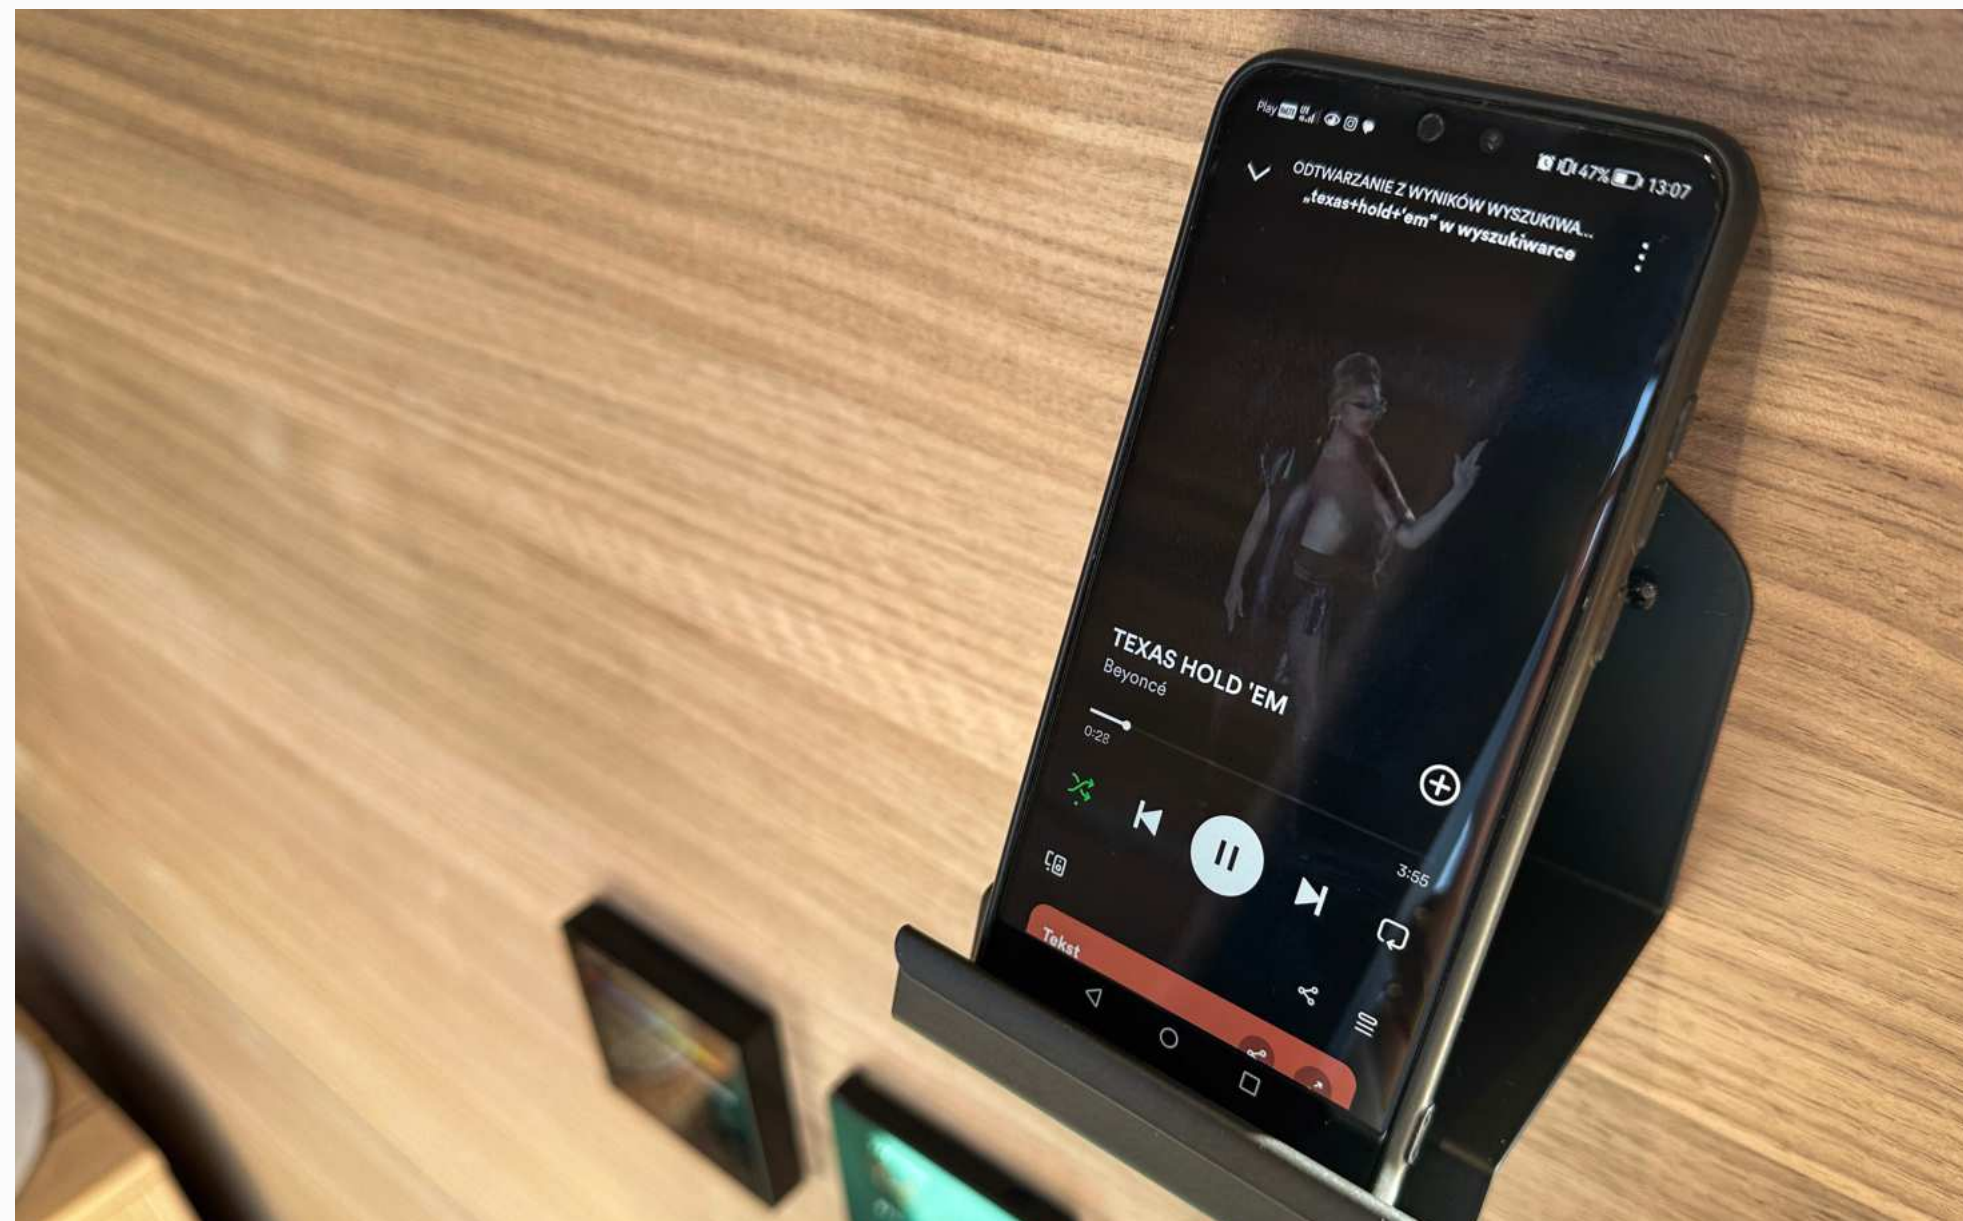

INSULATION -
10MM MINERAL
ROCK WOOL

Inadequate insulation in the sauna increases electricity consumption and significantly prolongs the heating time. Our entire sauna is insulated with mineral rock wool, ensuring it retains heat effectively, doesn't release warmth to the surroundings, heats up quickly, and is energy-efficient.

H U U M U K U C O N T R O L L E R

In budget saunas, controllers are omitted, and the heater is manually set using knobs. The Estonian HUUM UKU controller enables easy and quick sauna control. You can connect to it via Bluetooth with your phone and start heating the sauna while you're still away from home.

B L U E T O O T H A U D I O S Y S T E M

Standard saunas typically do not come with a sound system, and sometimes they can be purchased as additional accessories. The Europool Spa sauna comes equipped with a speaker system – you can control music via Bluetooth

TRIPLE GLAZED,
DOUBLE CHAMBER WINDOW

A window with such construction provides better insulation, reduces heat loss, resulting in energy efficiency. Additionally, it offers improved noise protection.

ESSENTIAL EQUIPMENT INCLUDED IN THE SET

The set includes all the necessary equipment for sauna sessions: sauna stones, thermometer, hourglass, and a cedar bucket with a ladle for pouring water over the stones.

LED LIGHTING SYSTEM

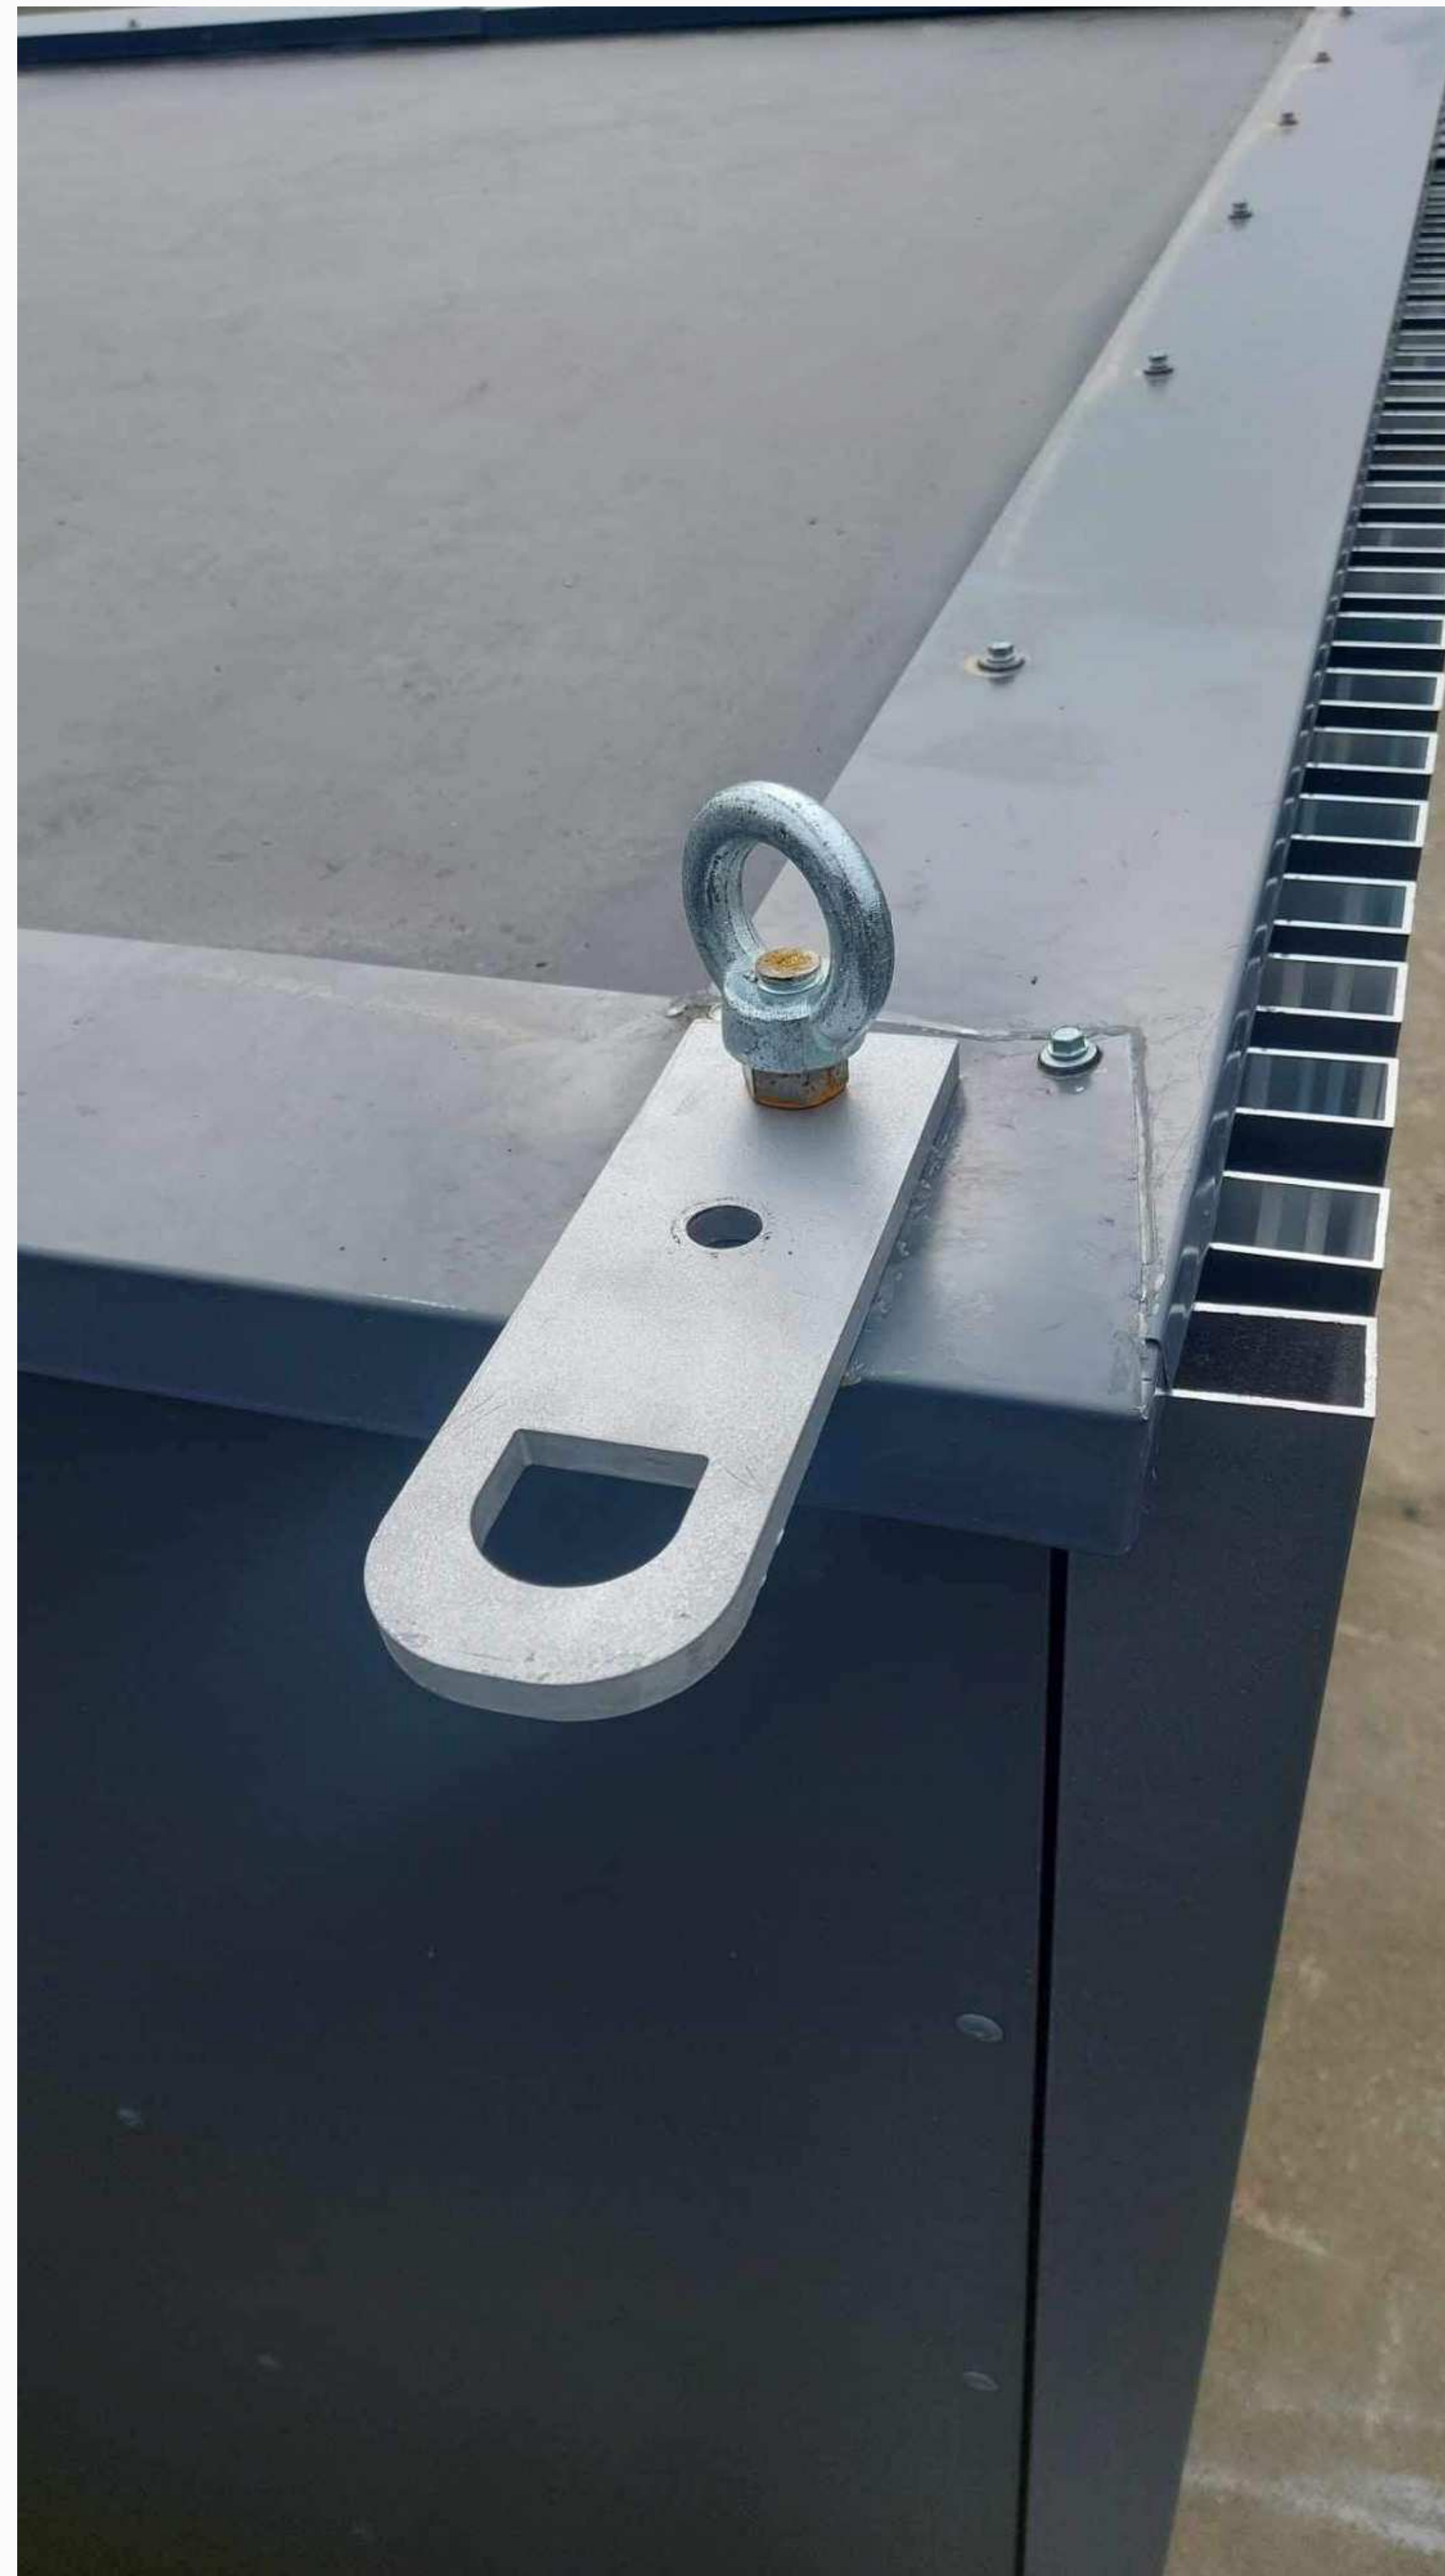

The Europool Spa sauna is equipped with a concealed LED lighting system. You can control the lighting colors and choose any from the RGB palette.

ADDITIONAL ROOM - ANTEROOM

Our saunas feature an anteroom where you can leave your belongings, change clothes, and prepare for your sauna session.

EFFICIENT TRANSPORT

Very often, companies selling saunas do not have their own fleet – the transport of the sauna lies with the customer. If you wish, we can transport the sauna to your garden using our own fleet.

U N L O A D I N G I N S T R U C T I O N S

1. The sauna structure is made of steel. Handles of dedicated strength are attached to the steel frame/profiles.
2. For unloading, the following are required: 4x webbing slings (min. length: 6 m; min. load capacity: 2 t),
3. Fasten the webbing slings to the steel handles (silver) using shackles.
4. Attach the other end of the webbing slings to the crane hook.

CAUTION: Watch out for the glass!
CAUTION: Four-legged slings can be used for unloading. CAUTION: Due to the safety of the structure (aluminum and glass elements), dark steel, protruding handles are used to secure the load during transport.
